Driver Safety Awareness

Introduction

Around 2000 people are killed on our roads each year and up to one third of all road accidents and deaths involve someone on company business.

Driver safety whilst driving for business is shifting from personal to corporate responsibility and management can be held vicariously responsible for the actions of their employees. All employers have a duty to provide and maintain a safe place of work. Employers, management and employees need to understand the risks involved in road transport and how they can be controlled.

Course Duration

SSG offer this course over half a day as a classroom course and can be tailored to the client's driving requirements.

Course Attendees

This course is intended for company drivers and all personnel who drive as part of their work activities.

Course Programme

- Safety legislation and its application to driver safety
- Common risks associated with work-related driving
