

Radiation Awareness e-learning

Introduction

Our radiation awareness course has been created to give employers and employees a clear understanding of what constitutes radiation hazards in the workplace and how to recognise and address the risks associated with excessive radiation exposure. The course helps learners build confidence in identifying sources of radiation, understanding legal and organisational responsibilities, and applying effective control measures to promote a safer working environment.

As part of our modern learning approach, this qualification is available through **interactive e-learning**, designed to increase engagement, flexibility and learner confidence. Our digital platform supports active learning through scenario-based activities, short knowledge checks, multimedia content and tutor-supported forums. This enables learners to study in a way that suits their schedule and preferred learning style.

Course Duration

We offer this as a flexible e-learning course, allowing delegates to study anytime, anywhere and at a pace that suits them.

Delegates will be given a three-month licence from first access to complete the course. Once this licence expires, delegates will be required to pay a fee to reactivate it and should contact our Customer Service Team for more information.

Course Attendees

This course is suitable for employers and employees alike.

The e-learning format is particularly beneficial for:

- Learners who prefer flexible, self-directed study
- Busy professionals who need on-demand access
- Those who benefit from interactive content rather than traditional text-based learning
- Remote teams and organisations seeking consistent training across multiple sites

Course Programme

On completion of this e-learning programme, learners should be able to:

- Describe the types of radiation and explain how they can cause harm
- List examples of workplace sources of different types of radiation
- Summarise the three key regulations related to radiation safety in the workplace
- Recognise basic radiation control measures
- Identify actions employers and employees can take to minimise risks

Training Certification and Assessment

Successful delegates will receive an SSG training certificate, which is valid for three years.
