

Safe Use of Ladders and Steps Online

Introduction

The Working at Height Regulations require all individuals who are involved with working at height activities to be trained and competent. Working from either ladders or stepladders can be potentially dangerous.

This course is aimed at improving knowledge and enhancing the ability to use ladders and steps safely.

Course Duration

SSG offer this virtual online course over 2 hours.

Course Attendees

This course is aimed at any person, from any industry, who is required to use ladders and steps during the course of their work.

Course Programme

- Relevant legislation
- Ladder types and accessories
- Safe use of ladders and step ladders

Training Certification and Assessment

On successful completion of training, delegates will receive an SSG course attendance certificate.

Suggested Follow on and Complementary Courses

- PASMA Towers for Users
