

CDM for Designers and Principal Designers

Introduction

The Construction (Design and Management) Regulations (CDM 2015) are designed to improve construction-related health and safety management, have the right people for the right job at the right time to manage on-site risks and focus on effective planning not the paperwork.

This course gives an overview of CDM regulations whilst focusing on the duties of the designers and principal designers.

Course Duration

SSG offer this course over half a day as a classroom or virtual course.

Course Attendees

This course is suitable for any person or organisation who takes on the role of designer or principal designer. Designers include architects, civil and structural engineers, building surveyors, landscape architects or building service designers.

Course Programme

- CDM overview
- Duty holder responsibilities
- Pre-construction information
- Design risk assessment and control
- Red, amber, green (RAG) lists and their purpose
- Liaison with duty holders during the construction phase
- Preparation of the health and safety file
- Handover to a principal contractor
- Workshops include pre-construction information, the health and safety file and design risk assessment

Training Certification and Assessment

Delegates will receive an SSG course attendance certificate on successful completion of the course.

Suggested Follow on and Complementary Courses

- Risk Assessment Workshop
- NEBOSH Health and Safety Management for Construction (UK)
