

Fire Safety Awareness

Introduction

The Regulatory Reform (Fire Safety) Order 2005 states that "the responsible person must ensure that his employees are provided with adequate safety training." The level of training will depend on findings from a fire risk assessment.

The SSG Fire Safety Awareness course aims to provide a basic understanding of fire and improve fire safety by raising awareness of fire prevention and precautions, including practical use of extinguishers.

Course Duration

SSG offer this course over half a day as a classroom or virtual course.

Course Attendees

This course is suitable for employees at all functional levels within the organisation who require a basic understanding of fire risk and fire control.

Course Programme

- Fire statistics and high-profile examples
- An overview of relevant legislation
- An overview of fire chemistry – the fire triangle and classes of fire
- An overview of fire prevention techniques including housekeeping, storage, and safe working practices
- An overview of fire precautions including fire detection, fire escape routes, drills and extinguishers
- Practical use of water and foam fire extinguishers

Training Certification and Assessment

Delegates will be assessed on their input during the practical exercise and on the course. SSG course attendance certification will be issued on successful completion of training and is valid for three years.

Suggested Follow on and Complementary Courses

- Fire Warden
- Fire Safety Management
- NEBOSH Certificate in Fire Safety
